L Series

L - 001

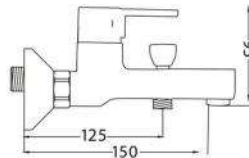

BATHROOM FAUCET

- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.16 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connections are G 1/2"
- Box 12 pieces.

L - 002

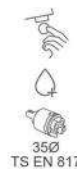

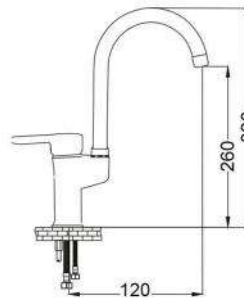

KITCHEN FAUCET

- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.16 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connections are G 1/2"
- Box 12 pieces

L - 003

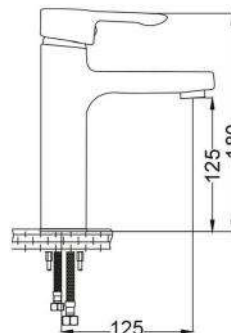

KITCHEN FAUCET

- Water saving special aerator (foam flow, lime breaker, flow rate: 8lt / min)
- Ideal working pressure 3-4 Bar
- Our product is made of MS58/MS63 brass low pressure ingots
- Surface coating is 0.16 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 M-10 25 bar pressure resistant steel braided flex used
- Box 12 pieces

L - 004

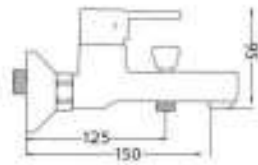

WASH BASIN FAUCET

- Water saving special aerator (foam flow, lime breaker, flow rate: 8lt / min)
- Ideal working pressure 3-4 Bar
- Our product is made of MS58/MS63 brass low pressure ingots
- Surface coating is 0.16 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 M-10 25 bar pressure resistant steel braided flex used

L GOLD SERIES

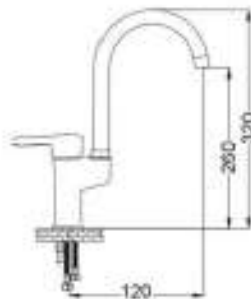

LG - 001

BATHROOM FAUCET

- Our product is made of H556/H563 brass low pressure ingots
- Surface coating is 0.05 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connections are G 1/2
- Box 12 pieces

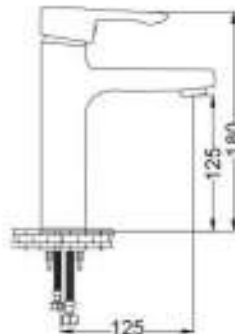

LG - 002

KITCHEN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure 3-4 Bar
- Our product is made of H556/H563 brass low pressure ingots
- Surface coating is 0.05 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 1/2 M-1/2 25 bar pressure resistant steel braided flex used
- Box 12 pieces

LG - 003

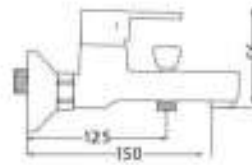

WASH BASIN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure 3-4 Bar
- Our product is made of H556/H563 brass low pressure ingots
- Surface coating is 0.05 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 1/2 M-1/2 25 bar pressure resistant steel braided flex used

WASH BASIN FAUCET

- Water saving special aerator (foam flow, flow breaker, flow rate 8L/min)
- Ideal working pressure 3-4 Bar
- Our product is made of MS58/MS57 brass low pressure ingots
- Surface coating is 0.6 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H-05 25 bar pressure resistant steel braided flex used

P SERIES

P - 001

TS EN 817

BATHROOM FAUCET

- Our product is made of MS58/MS63 brass low pressure fittings
- Surface coating is 0.36 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connections are G 3/8
- Box 12 pieces

P - 002

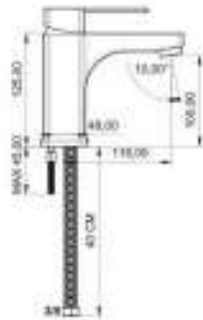

TS EN 817

KITCHEN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure 3-4 Bar
- Our product is made of MS58/MS63 brass low pressure fittings
- Surface coating is 0.36 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 M 10 25 bar pressure resistant steel braided flex used
- Box 12 pieces

TS EN 817

BASIN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure 3-4 Bar
- Our product is made of MS58/MS63 brass low pressure fittings
- Surface coating is 0.36 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 M 10 25 bar pressure resistant steel braided flex used

S SERIES

S - 001

BATHROOM FAUCET

- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.15 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connections are G 1/2"
- Box 12 pieces

350
TS EN 817

S - 002

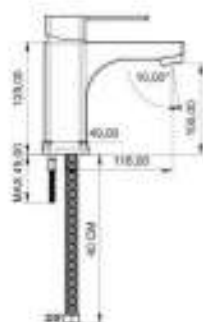

KITCHEN FAUCET

- Water saving special aerator (flame flow, time breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 Bar
- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.15 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8" M-10 25 bar pressure resistant steel braided flex used
- Box 12 pieces

TS EN 817

K SERIES

K - 001

BATHROOM FAUCET

- Our product is made of MS58/MS53 brass low pressure fittings
- Surface coating is 0.18 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Metal shower connections are G 1/2"
- Size 12 pieces

403
TS EN 817

K - 002

KITCHEN FAUCET

- Water saving special aerator (flam flow, line breaker, flow rate: 88 l/min)
- Ideal working pressure 2-4 Bar
- Our product is made of MS58/MS53 brass low pressure fittings
- Surface coating is 0.18 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H-10 25 bar pressure resistant steel braided flex used
- Size 12 pieces

WASH BASIN FAUCET

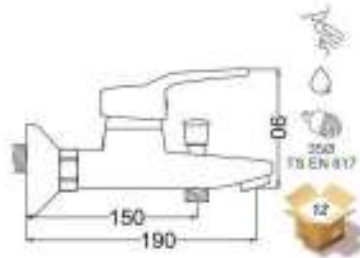

- Water saving special aerator (flam flow, line breaker, flow rate: 88 l/min)
- Ideal working pressure 3-4 Bar
- Our product is made of MS58/MS53 brass low pressure fittings
- Surface coating is 0.18 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H-10 25 bar pressure resistant steel braided flex used

403
TS EN 817

E SERIES

E - 001

BATHROOM FAUCET

- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.15 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hard shower connections are G 1/2"
- Box 12 pieces

E - 002

KITCHEN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 bar
- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.15 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8" M10 25 bar pressure resistant steel braided flex used

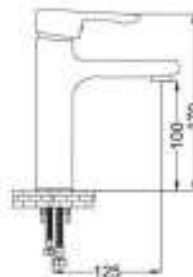

E - 003

WASH BASIN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 bar
- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.15 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8" M10 25 bar pressure resistant steel braided flex used

E - 004

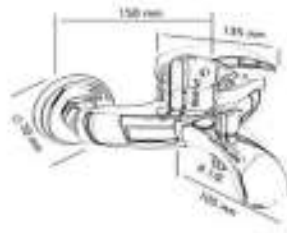

WASH BASIN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 bar
- Our product is made of MS58/MS53 brass low pressure ingots
- Surface coating is 0.15 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8" M10 25 bar pressure resistant steel braided flex used
- G 3/8" M10 25 bar pressure resistant steel braided flex used

F SERIES

F - 001

BATHROOM FAUCET

- Our product is made of MS20/MS23 brass low pressure rigids
- Surface coating is 0.30 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connectors are G 1/2
- Box 12 pieces

400
TS EN 917

F - 002

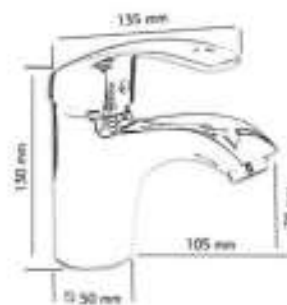

KITCHEN FAUCET

- Water saving special aerator (foam flow, flow breaker, flow rate: 0.8 l / min)
- Ideal working pressure: 1-4 Bar
- Our product is made of MS20/MS23 brass low pressure rigids
- Surface coating is 0.30 mm chrome coating
- 350 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 M-10 25 bar pressure resistant steel braided flex used
- Box 12 pieces

450
TS EN 917

F - 003

WASH BASIN FAUCET

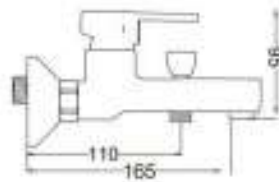

- Water saving special aerator (foam flow, flow breaker, flow rate: 0.7 l / min)
- Ideal working pressure: 3-4 Bar
- Our product is made of MS20/MS23 brass low pressure rigids
- Surface coating is 0.30 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 M-10 25 bar pressure resistant steel braided flex used
- G 3/8 M-10 25 bar pressure resistant steel braided flex used

400
TS EN 917

F SERIES

F - 004

BATHROOM FAUCET

- Our product is made of MS58/MS63 brass low-pressure inputs
- Surface coating is 0,16 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hot shower connections see G 1/2"

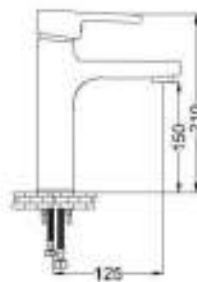

F - 005

KITCHEN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 bar
- Our product is made of MS58/MS63 brass low-pressure inputs
- Surface coating is 0,16 mm chrome coating
- 90 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H 10 25 bar pressure resistant steel braided flex used

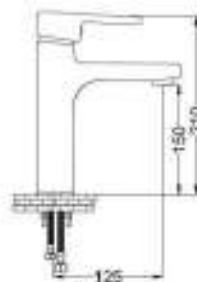

F - 006

BASIN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 bar
- Our product is made of MS58/MS63 brass low-pressure inputs
- Surface coating is 0,16 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H 10 25 bar pressure resistant steel braided flex used

F - 007

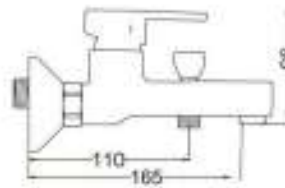

BASIN FAUCET

- Water saving special aerator (foam flow, line breaker, flow rate: 8l / min)
- Ideal working pressure: 3-4 bar
- Our product is made of MS58/MS63 brass low-pressure inputs
- Surface coating is 0,16 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H 10 25 bar pressure resistant steel braided flex used

M GOLD SERIES

MG - 001

BATHROOM FAUCET

- Our product is made of M358/M353 brass low pressure ingots.
- Surface coating is 0.10 mm chrome coating.
- 25 bar pressure resistant ceramic cartridge used.
- Need shower connections are G 1/2.

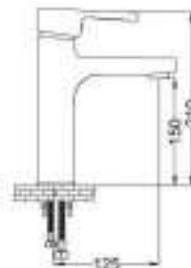

MG - 002

KITCHEN FAUCET

- Water saving special aerator (foam flow line breaker, flow rate: 3l / min).
- Ideal working pressure 3-4 Bar.
- Our product is made of M358/M353 brass low pressure ingots.
- Surface coating is 0.10 mm chrome coating.
- 360 degree rotating tube.
- 25 bar pressure resistant ceramic cartridge used.
- G 3/8 M 10 25 bar pressure resistant steel braided flex used.
- Box 12 pieces.

MG - 003

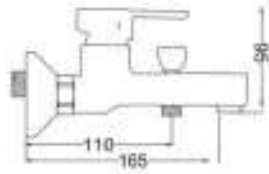

BASIN FAUCET

- Water saving special aerator (foam flow line breaker, flow rate: 3l / min).
- Ideal working pressure 3-4 Bar.
- Our product is made of M358/M353 brass low pressure ingots.
- Surface coating is 0.10 mm chrome coating.
- 25 bar pressure resistant ceramic cartridge used.
- G 3/8 M 10 25 bar pressure resistant steel braided flex used.

M ROSE SERIES

MR - 001

BATHROOM FAUCET

- Our product is made of H558/H553 brass low pressure alloys
- Surface coating is 0.36 mm chrome coating
- 25 bar pressure resistant ceramic cartridge used
- Hand shower connectors are G 3/8"

350
TS EN 817

MR - 002

KITCHEN FAUCET

- Water saving special sensor (foam flow, time breaker, flow rate: 8lt / min)
- Ideal working pressure 3-4 Bar
- Our product is made of H558/H553 brass low pressure alloys
- Surface coating is 0.36 mm chrome coating
- 360 degree rotating tube
- 25 bar pressure resistant ceramic cartridge used
- G 3/8 H40 25 bar pressure resistant steel braided flex used
- Box 12 pieces

PANEL RADIATORS

TEST PRESSURE	MAX WATER TEMPERATURE	NUMBER OF CONNECTIONS
13 BAR	110 °C	4xDIN G ^{1/2}
MAX OPERATING PRESSURE	WARRANTY	
10 BAR	10 YEARS	

. Latest Technology Painting

Type 22 panel radiators are cleaned by means of a set of treatments namely degreasing by immersion, degreasing by spray, iron-phosphate coating and passivation. Radiators primed by wet undercoating painting, immersion method and kiln-dried are dyed in RAL 9016 color by means of robot guns with the electrostatic epoxy powder-coating method and finishes with drying

. High Quality Product

High quality Erdemir cold rolled sheet metals use in production of steel panel radiators.

. Maximum Quality and Warranty

It makes production in modern facilities with ISO-9001 quality certificate in accordance with TS EN 442 standards. Each radiator is exposed to 13 bar test and is resistant to 10 bar operating pressure. The warranty is 10 years.

. Safety Packaging

Type 22 panel radiators are packed with bubble nylon packages and supported edge cardboards to ensure protection from outer impacts during transport and installation.

. High Efficiency

Type 22 panel radiators boast the maximum thermal efficiency with 33.3 mm-pitch water channel conduits and wide convector surface.

. Modern and Stylish Design

Type 22 panel radiators are modern with its smooth surface and stylish touch with its aesthetical design. It provides an elegant appearance to the decoration of the rooms.

. Easy Installation

Installation materials (hanging equipment, valve cork, blind flange, clips to hang the console, rawplugs and trifen screws) are included. The installation of the radiators is practical, it can be installed easily.

Quality Standards

Quality Standards

In accordance with our company objectives, our quality management in conformity with DIN ISO 9001 is mainly directed towards our customers and the market. Our inner factory quality standards include raw material testing, production survey, and testing of end products as prescribed in DIN standards.

Tests are conducted continuously in our own laboratory, guaranteeing maximum safety. All results are filed to provide the proceeding surveys and individual data measurement.

We also get the collaboration of the independent testing institutes to ensure that our products fit well with the other applicable specifications like DIN, O-Norm and ISO and that their quality remains at a constant high level.

All pipes and fittings produced in our factory undergo the following tests:

- Melting index test of raw materials
- Testing the accuracy of dimensions and surface nature
- Interior long-term pressure test of 1 hour at 20°C and up to 80 bar depending on the nominal pressure degree
- Notched bar impact test
- Thermal test
- Welding index of processed materials
- Microscopic examination
- Continuous tube sheet thickness survey and measurement

Samples of all feeds are submitted to a long-term internal pressure test lasting 1000 hours at 95°C and up to 18 bar.

It is our objective to carry out practice-oriented problem solving, by applying scientific methods and by satisfying our customers by quality and dependable delivery.

plastherm®

Long-term Behaviour / Durability

Long-term Behaviour / Durability

By means of the long-term internal pressure diagram and the given formula for determination of the reference tension, it is rather simple to determine the durability.

$$\sigma_v = \frac{P(d_a - S)}{2S}$$

Explanation of the formula:

σ_v = reference tension [N/mm²]
 P = internal pressure [N/mm²]
 d_a = external diameter of the pipe [mm]
 S = wall thickness of the pipe [mm]

Applicable:

1 bar = 0.1 N/mm²

Example :

Tube employed 20 X 3.4, nominal pressure degree PN 20, operational pressure 10 bar. The resulting reference tension will be:

$$\sigma_v = 1 \text{ N/mm}^2 \cdot \frac{(20 \text{ mm} - 3.4 \text{ mm})}{6.8 \text{ mm}}$$

If the reference tension is drawn as a straight line in the long-term internal pressure diagram and is caused to intersect with the isotherms of the corresponding operating temperature, the durability of the pipe to be anticipated in hours will result from the projection onto the X-axis.

In general, however, no point of intersection is reached under the operating conditions encountered in practice. Life > 50 years.

Calculating of security factor SF:

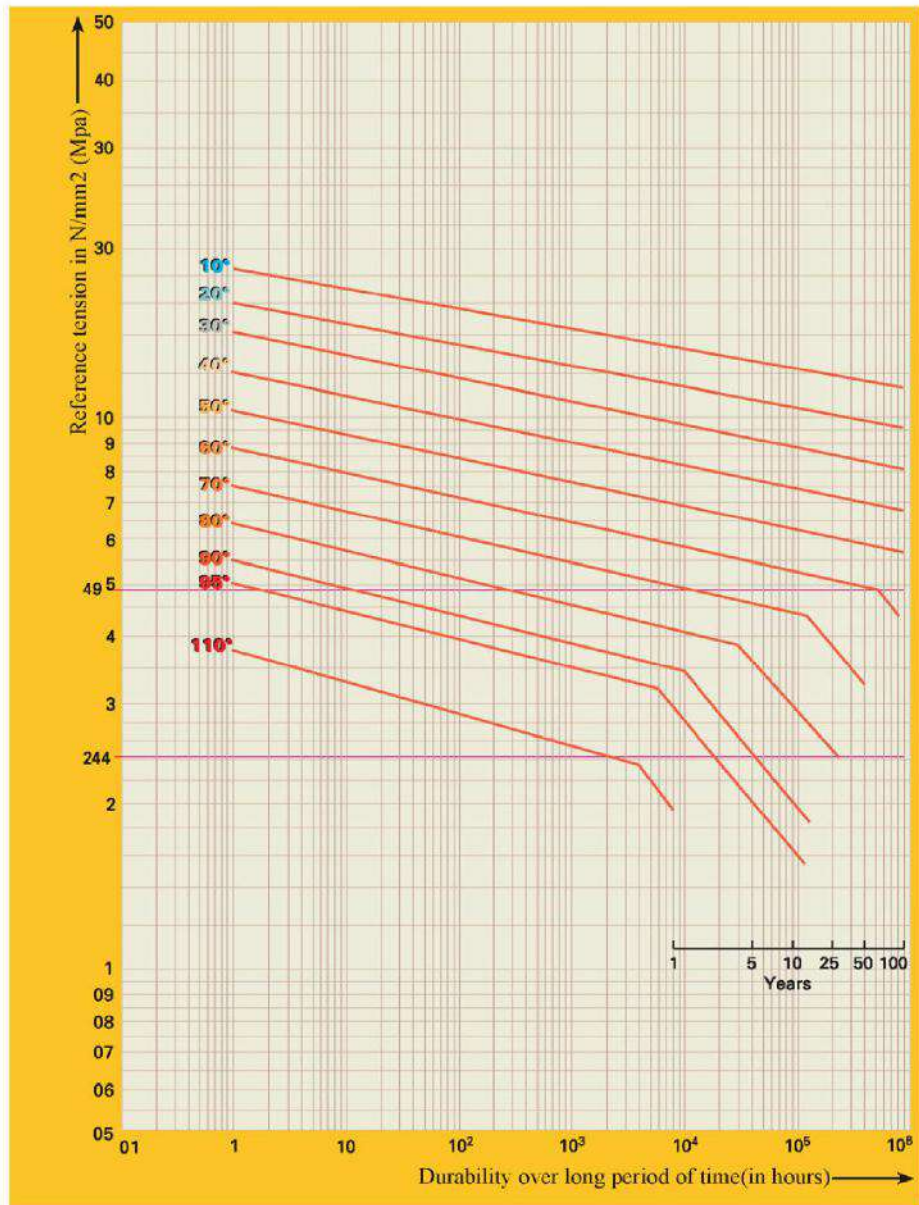

σ_v (for instance 50 years 60° C) = 4.9 N/mm² established from the diagram. It becomes clear that Plastherm pipes present tremendous safety margins in real application situations.

In the planning phase, it is customary to start from the peak temperatures to be anticipated; if we take into account the operational temperatures, which in most cases are considerably lower, and their effective periods, the safety margin is even higher.

plastherm®

Behaviour under long term stress

Behaviour under long term stress

Elongation and Bending

The following items need to be taken into consideration when calculating modifications in length:

- Ambient and materials temperature upon installation
- Temperature difference between the lowest and the highest pipe wall temperatures
 - Expansion coefficient
- The formula for the calculation of length alterations is as follows:

$$\Delta L = \alpha \cdot L \cdot \Delta T$$

Explanation:

ΔL = Length alteration in mm

α = Expansion coefficient in K^{-1}
 polypropilene pipes $\alpha = 0.15$,
 prostab AL/PPR composite pipes
 $\alpha = 0.05$

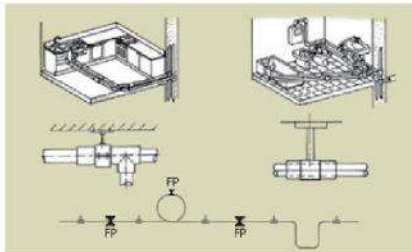

L = Pipe length in (m)

ΔT = Difference in temperatures in K

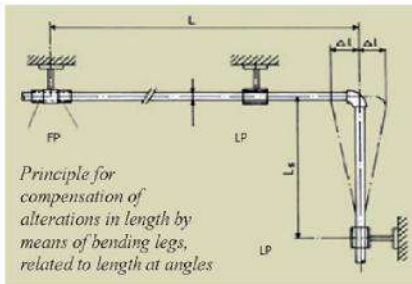

Pipe length = 4 m	Temperature range
Pipe wall temperature	60° C
Temp, at installation	15° C
Difference in temp	45 K

$$\Delta L_2 = 0.15 \times 4 \times 45 = 27.00 \text{ mm}$$

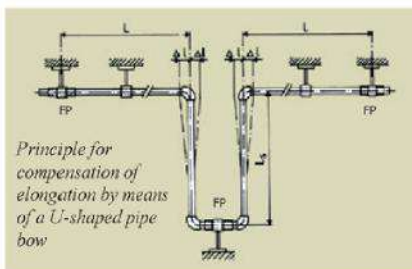

The alteration of length may be compensated by means of extension loops, bending legs, extension bows or appropriate adapters.

Extension bows

Principle for compensation of alterations in length by means of bending legs, related to length at angles

Principle for compensation of elongation by means of a U-shaped pipe bow

FP = Fixing point

LS = Length of bending leg

L = Length of pipe

LP = Gliding rail

$$\Delta L = \Delta L_1 + \Delta L_2$$

The minimum length of the bending leg results from:

$$L_s = K \cdot \sqrt{d \cdot \Delta L}$$

Explanation:

L_s = Length of bending leg in mm

K = Constant depending on material (K value for PP = 15)

d = Pipe diameter in mm

Δ = Elongation in mm, calculated by equation

$$\Delta L = \alpha \cdot L \cdot \Delta T$$

Vide also following example of graphic and mathematical determination of the bending leg.

plastherm®

Application areas

Application areas:

1. Heating and water supply installations of residential buildings and offices.
2. Hot and cold water pipe installations.
3. Industrial, urban water-supply, and agricultural water installations
4. Passenger compartments on ships and trains

CAUTION!

1. Protect the pipes from direct impact
2. Don't expose them to sunlight for a long time
3. For bending don't use fire on the pipes, but only industrial air-blower where the temperature of the air-stream is no more that 140° C
4. While loading the pipes on a vehicle do not bend them

plastherm®

Welding Instructions

The quality and the life span of any pipe installation depends equally on both the geometric accuracy and the weldings. Connecting pipes and fittings through melting takes just a few seconds. After a few minutes the welded pipe installation is ready to be installed.

You cut the pipe, heat the fitting with the welding machine and then connect the two parts. That's all Fast, without substantial efforts and with wonderful result.

All welded connections are completely safe because when the polypropilene cools down there's no change in its structure, shape or durability.

Instructions for welding pipes and fittings

1. Choose the appropriate detail and put it on the welding machine.
2. Turn on the welding machine. Wait until the two control indicators are heating. When the device is ready for use the indicator turns off. This means that the necessary temperature has been reached /260° C ± 10° C/
3. Attach properly the end of the pipe and the fitting to the welding device.
4. If the pipe or the fitting is dirty clean it with water and alcohol solution.
5. Then heat equally for the duration of few seconds both the pipe and the fitting. Then connect them and leave them for a few minutes to cool down so that the welding be successful.
6. The necessary heating time, welding time and cool-down time for each corresponding pipe diameter is shown in the following table.

External pipe diameter mm	Insert depths mm	Heating period secs	Processing period secs	Cooling period mins
16	13	5

The Advantages of Plastherm PVC-U Pipe

1) PVC-U waste water pipes are resistant to organic, inorganic acids and alkalines. They keep their physical specifications up to 60 C, does not get deformed.

2) Durable to outer effects as it is a hard PVC and because of its additional materials.

3) The inner surface being smooth creates an ideal liquid flow. So no filthiness as a result of a clogage occurs.

4) PVC-U waste water pipes and fittings' PN is produced with highest quality standart so noise conductivity is minimum and so provides silent environments.

5) PVC-U waste water pipes and fittings' outer protective plating provides long lasting glimmering and esthetic look even for open air installations.

6) PVC-U waste water pipes and fittings are used safely in open air systems due to their high UV ray and stike resistancy.

1) PVC-U Atık Su Boruları Organik, inorganik asitlere ve alkalilere karşı dayanıklıdır 60°C'ye kadar fiziksel özelliklerini korur, deforme olmaz.

2) Sert PVC olması ve katkı malzemelerinin özelliklerinden dolayı dış etkenlere karşı dayanıklıdır.

3) İç yüzeyin pürüzsüz ve düz olması ideal bir akışkanlık sağlar. Bu nedenle tıkanmaya sebebiyet verecek kirliliğin oluşması söz konusu değildir.

4) PVC-U Atık Su Boru ve Ekparçalarının et kalınlıkları standartların en üst seviyesine göre üretildiğinden, ses iletimini minimuma indirir. Bu nedenle sessiz ortamlar sağlar.

5) PVC-U Atık Su Boru ve Ekparçalarının dış koruyucu kaplaması, açık tesisatlar için bile, uzun süre dayanan parlak ve hoş bir görünüm sağlar.

6) PVC-U Atık Su Boru ve Ekparçaları yüksek UV ve darbeye dayanıklı yapılarıyla, dış tesisatlarda güvenle kullanılır.

Important not fore Installation

1. None of the pipes and fittings should be heated for installation.

2. For the easy installation lubricant is applied to the visible part of the gasket and on the outer surface of the pipe's depth to be inserted. Do not use lube oils as a lubricant. Cleaning materials of liquid gel type can be used. The insertion is made on linear axis without forming any angle.

3. Avoid using different materials for mounting the rings on the wall.

1. Hiçbir boru ve ekparça montaj için kesinlikle ısıtılmamalı.

2. Boruların rahat takılabilmesi için contanın görünen yüzeyine ve takılacak borunun girme derinliğine kadar dış yüzeyine kaydırıcı sürülür. Kaydırıcı olarak madeni yağlar kesinlikle kullanılmamalıdır. Sıvı jel türü temizleyici maddeler kaydırıcı olarak kullanılabilir. Açık oluşturmadan düz eksenle itirilerek ekleme yapılır.

3. Kelepçelerin dışında duvara monte için başka malzemeler kullanılmamalı.

Plastherm, PVC-U Pipes & Fittings were produced according to TS-275-1, EN1329-1 / 13.4.199 by Europe and Turkish standard. Plastherm offers best quality and services as well as better competitive prices in domestic and foreign market forever.

Plastherm, PVC-U atık su boru ve ekparçaları TS-275-1, EN1329-1 / 13.4.199 Standartlarına göre üretilmekte olup, ürettiği bütün ürünlerde olduğu gibi PVC-U atık su boru ve ekparçalarında da kalitesi ile iddialıdır.
